

2014 WORLD FIREFIGHTERS GAMES LOS ANGELES IAFF TRAINING PROGRAM

FOUR HOURS THAT COULD SAVE YOUR LIFE THIS SUMMER.

Professional development is an important part of any fire fighters on-going training. Come to the Games in Los Angeles this August and get the latest knowledge and tips from the IAFF's team of experts in fire ground survival and injury prevention.

Places at this important single-day course are available on:

WEDNESDAY 20 AUGUST 2014
THURSDAY 21 AUGUST 2104
FRIDAY 22 AUGUST 2014

This training is FREE to all registered competitors at the World Firefighters Games. But places are limited so register for the Games and book your training place now.

MORNING SESSION FIRE GROUND SURVIVAL (2 HOURS)

Fire fighter fatality data compiled by the United States Fire Administration indicates fire fighters "becoming trapped and disoriented" represent the largest portion of structural fire ground fatalities.

The need to train for fire ground survival is clearly evident, the IAFF's Fire Ground Survival Program trains fire fighters to perform potentially life-saving actions if they become lost, disoriented, injured, low on air or trapped.

This workshop will review the data and research used to develop these life saving techniques and provide information on how you can bring this training to your members.

Want to know more? Visit www.wfg2014.com for a full training schedule.

Participation in this course may allow you to claim deductions depending on your individual circumstances.

AFTERNOON SESSION HOW TO PREVENT OR MINIMIZE INJURIES (2 HOURS)

The International Association of Fire Fighters (IAFF), International Association of Fire Chiefs (IAFC) and 10 pairs of local unions and their municipalities joined together to form the Fire Service Joint Labor Management Wellness-Fitness Task Force.

The Task Force has dedicated itself to developing a holistic, positive rehabilitating and educational approach to wellness and fitness programs in the fire service.

The IAFF/IAFC Task Force has determined that successful implementation of the Wellness/Fitness Initiative (WFI) and the Candidate Physical Ability Test (CPAT) requires a fire fighter in each department who can take the lead.

This individual must have the ability to design and implement fitness programs, to improve the wellness and fitness of his or her department and to assist with the physical training of recruits.

This workshop will discuss the process to become a Peer Fitness Trainer (PFT), the benefits of implementing a PFT program for your members and your department, as well as practical applications and demonstrations on the importance of proper movement to help avoid work-related injuries.
